

## Self-assessment of gender capacities and perceptions

### Gender identity

1/3rd of the survey participants (n=84) refrained from disclosing any gender identity

19,5 % participants considered themselves as belonging to a marginalized group

### Ways forward

**Inclusion of a wider range of dimensions of inequalities as intersecting with the gender dimension (= gender<sup>+</sup>), e.g. race/ethnicity, wealth/class and diverse genders.**

### Gender Capacity

Of the survey participants:

- 68% say equal opportunities prevail in their institution
- 51% report having gender policies
- 38% support considering gender aspects in research content; 13% not
- 13% had some gender training

### Training and Support

Survey participants like to receive specific gender<sup>+</sup> support or training (from 30-45%)

### Ways forward

**Round of talks with WP leaders to explore:**

- Aspects of gender<sup>+</sup> in collaboration and contents
- Optimal modalities of gender<sup>+</sup> support and/or training

**Specific gender<sup>+</sup> trainings at consortium level or multi-WPs level**

### Engagement is there; a joint effort is needed for it to flourish

The survey shows that a substantial number of SPRINT participants are fully engaged in the project's commitment to foster gender equality.

A joint effort is needed to ensure ALL actively support and collaborate to reach the commitments, and to enable to expand on the existing gender<sup>+</sup> capacity.
